## About Profile

My Name is shrisha kulawade. I am a motivated and curious IT diploma student from Amrutvahini Polytechnic, passionate about programming and technology. Skilled in Python, C ,C++ and Java. I aim to grow my knowledge and contribute to real-world projects while continuously learning.

## WORK EXPERIENCE

- 1.AI and robotics(trainee)
2. Mechanics and Electronics

### • Robotics

Robotics is about making robots — machines that can do work.

Robots can move, pick things, clean, or even talk, depending on how they are made.

### • AI (Artificial Intelligence)

AI means making computers or machines smart.

It helps them think, learn, and make decisions like humans.

### • Mechanics

Mechanics is about moving parts and how machines work.

It deals with things like gears, motors, wheels, and levers.

It helps build machines that move, lift, or rotate..

### • Electronics

Electronics is about electric signals and circuits.

It includes wires, batteries, chips, sensors, and switches.

It helps control machines and send signals.
